Comments:

Hess Ceiba Crude Analytical Notes 300-400F

D2386 Freeze Point - Result is <-94F. Not entered in distillate table due to not being able to enter inequality signs. D2500 Cloud Point - Result is <-76F. Not entered in distillate table due to not being able to enter inequality signs. D97 Pour Point - Result is <-76F. Not entered in distillate table due to not being able to enter inequality signs. 650 D664 Total Acid Number - Results were balancing low to the whole crude. Recheck of the sample confirms original results. 1050 D445 Kinematic Viscosity @ 122F/50C - The sample is not applicable to the method due to the sample being a solid at specified temperature. The kinematic viscosity was ran at 275F/135C instead.

*** The GC Analysis Covers 5.7 LV% of crude up to a TBP of 72.0 deg. C.
